

WORKSMAN 2010 PAV3 AND TEAM DUAL TRIKE PRICE SHEET

PAV3 (Shown with optional mirrors, rear fenders and armrests)

SBST (Shown with optional armrests)

The PAV3 is an ergonomic marvel. Its semi-recumbent design allows you to sit back, have fun, and get great exercise at the same time! With its fully adjustable, high-back seat and optional fold-down armrests, the PAV3 is like a couch on wheels! Riding is made easier because when you lean back into the seat, you use your leg, back, and stomach muscles together! It's built with same industrial components as our top-of-the-line Mover tricycle, and comes with a coaster brake (1 or 3 speed), front drum brake, and rear basket. Add optional rear view mirrors, cabinet, canopy top kit, cup holder and rear fenders and you're ready for anything! It is truly the ultimate in comfort, and with its adjustability and durability, it can handle people of all shapes, weights, and sizes!

The Side by Side Team Dual Trike offers a riding experience like no other trike! Unlike conventional tandems, the Team Dual Trike lets you sit next to your partner, so you can really share the riding experience together. It allows two riders of different size and ability to ride together at their own pace. How? With twin independent transmissions and a split rear axle, each rider turns their own pedals and wheel! One rider can rest and the other can still pedal and go, or pedal at two different speeds! The Team Dual Trike, which shares riding characteristics and most available upgrades with the PAV3, is perfect for facility tours, physically challenged / companion situations, rental fleets, and vacation resorts.
