OPTIONAL FRONT BASKET (G2)

The Classic American Bike – but with a big difference. These are built “Worksmen Tough” for day in, day out use. Thousands of these rugged performers report to work each morning – sometimes after working all night! From shipyards to movie lots, newspaper delivery to the US Postal Service, country club to country store, Worksmen Industrial Bikes keep delivering. Credit the fully lugged frame, “knock-out” industrial front hubs, “posi-quad” welding, and steel clincher rims. These and dozens of other “Worksmen Tough” features are what make the “Industrials” the bike of choice among leading companies the world over. And to prove that extraordinary toughness need not mean ordinary looks, the Industrials carry the classic American profile, set off beautifully by lots of chrome, standard or optional paint choices, and cantilever frames.
